It's the new #1.

**Subject:** FW: ECHA Consent Agreement

I had a request from Tedd Terrmunde that we add language to the effect that ECHA will provide to EPA the Bid Specifications for review prior to the issuance of the request for proposals. This was a request that Tom Alcamo had made in the April 7 letter to Tedd, and including it this clarifies that ECHA will provide those documents to EPA if so requested.

Here's a clean copy with Tia's name fixed and EPA's comments accepted.

Since no one called in, I've rescheduled with the corrected number for 1 pm today. I can't recall if that fits with your schedules. I also understand that this is on fairly short notice, so if that doesn't work just let the group know and I'll move the time around. I can generally find time tomorrow or Thursday morning.

Best,  
 Leo

Thanks, Courtney. I don't have any problems with the description, but I do have a few (hopefully minor) comments (redline attached). In summary:

1. EPA reviewed but did not approve the RAP;
2. I don't want to imply that EPA is performing this under the RAP, as opposed to its own authority—I think that starts to get EPA into trouble regarding providing services to other entities; and
3. Related, because EPA is performing this work under its own authority, I don't want to imply that this access agreement is somehow a binding agreement or even MOU for EPA to perform the work. Don't get me wrong: EPA fully intends to perform this work. But again, I think that brings in a number of other issues that can otherwise be avoided.

That said, this summary is longer than the changes made to the document.

Best,  
Leo

**Subject:** ECHA Consent Agreement

In preparation for our meeting, I fleshed the EPA consent for access to Property for Sampling and Monitoring to add context to the agreement. Hopefully, there is nothing objectionable.
